

**Amendments to the Specification:**

Please amend the typographical error in Table 12, at page 21, of the application as filed, the description of which begins on page 20, line 13, as follows:

The bulk density of the resultant particulate samples were measured as described above and the mono-dispersivity index (MDI) and the results are shown in Table 12. The weight mean size (WMS) was also determined and is also shown in Table 12. The WMS was determined by sieving 100 g of particulate material using 6 sieves having mesh sizes in the range 710 to 125  $\mu\text{m}$  for 30 minutes and plotting the resultant weight distribution of particles at each size to enable the weight mean size to be interpolated.

**TABLE 12**

Sample	WMS [ $\mu\text{m}$ ]	MDI	Density [ $\text{kg}/\text{m}^3$ ]
21	230	0.4	610
22	360	0.6	510
23	320	0.8	530
24	330	0.9	410
25*	380	1.3	420
<del>36</del> *26*	375	1.4	460
27*	290	1.6	380
